INSIDE INFOR M3 DASHBOARD

Make The Most Of Your Data That's Inside & Outside M3

Having invested in Infor M3 to streamline financial and operational processes across the business is a great decision. If you're looking for a way to provide more flexibility to meet reporting and analysis needs of M3 data or combining it with information from other sources, without crippling performance, then that's where Inside Info can help with Qlik business analytics and our *Inside Infor M3 Dashboard.*

The inherent complexities, lack of speed and usability, and time-intensive nature of business analytics approaches often hinder executives and analysts from improving decision making and business performance.

The growing need for broader data literacy among executives and business teams requires a rethink of how information needs are addressed within organisations. For those businesses running Infor M3, that means rethinking how to better leverage M3 and other data to provide self-service intuitive dashboards and analytics that engage all types of users - from executives to analysts and operational team members. When used correctly, key insights can be delivered quickly and provide a consolidated, consistent view of performance across the enterprise for more effective, agile decision making.

Inside Info has over 19 years' experience in working with businesses running M3 to develop the *Inside Infor M3 Dashboard*, a proven, best practice approach to business analytics using the leading Qlik business intelligence platform. Used by firms like Manassen Foods to deliver a consolidated and near real-time dashboard of performance, across all operations with one click from summarised to transactional level detail, that anyone can use, accessible on a server, mobile or desktop, delivered typically within 30 days.

Inside Info offers the full spectrum of business analytics software and services including licensing, scoping, design, development, integration, training, project management and support services for the leading Qlik business intelligence platform.

Our Inside Infor M3 Dashboard Provides:

- **A one-screen view of all the facts:** consolidating data from M3 and other data sources to ensure cross functional visibility, so you have a clear view of sales, inventory, service levels, customers, financial and other operational performance. A number of filters allow you to understand key measures against budget over any time period compared to another. Linking transactional processes, dramatically improving business strategies and uncovering business opportunities.

- **Consolidated view across multiple businesses & divisions:** Provides a single dashboard view of financial and operational performance across companies within a Group or individual business areas and then drill-down access to any area of the business within each – often difficult to achieve with other BI tools given multiple and varied data sources.

- **A 360 degree view of customer behaviour, product, channel, supply chain & financial performance:** Ability to react quicker to opportunities that arise in the business and isolate areas for focus.

- **Near real-time visibility into operations**: Instead of out-of-date reports. On-demand self-serve analysis of data, often replacing hundreds of OLAP based reports and empowering users to perform their own analysis reducing IT support by up to 90%. We provide both self-serve analysis, guided analytics, advanced analytics options, embedded analytics and reporting.

- **Sub-second query response on very large data volumes** into the hundreds of million records without losing transactional level detail, with data refreshing as often as your underlying source systems.

- **Ability to view information at a high-level, transactional-level and anywhere in between** in any path decided by the user, with no pre-defined drill-down paths. If you've got a business question, odds are you'll be able to answer it – you don't have to wait for another report. Easily consolidates data from any and multiple data sources both within and outside Infor.

- **Simple to use, available everywhere:** Access your dashboard from any device whether this be laptop, iPad, the web or your mobile device, with the same experience on each, being HTML5 compliant.

- **Available in the cloud or on-premise:** We offer a choice of deployment options depending on your needs for the Qlik BI platform.

- **Very fast implementation cycles:** A typical project is 30 days and is 53% the total cost of other BI solutions according to IDC. While adding in a new data source or building a new view of the data can be modified very easily within a few hours.

- **Our business analytics solutions are built on the scalable, enterprise class Qlik Analytics platform:** Recognised as a Leader in analytics by Gartner in its 2022 Analytics Platforms Magic Quadrant.

What Makes Us Different

Inside Info was founded to bring the promise of analytics to a much broader group of people making it simpler, more engaging, affordable and rapid to deliver. For over 19 years our sole focus has been to help mid sized and enterprise businesses use data to perform as well as they possibly can, as data and analytics specialists. We have a proven track record of client success currently supporting over 100 clients nationally, having delivered over 600 BI projects. We can offer strength & stability as a provider with the flexibility & personal touch of a boutique partner. This track record has allowed us to build industry, business function and system templates based on the leading Qlik BI platform that speeds up data integration, application development & delivery.

We bring strong industry and business process expertise to your project that many cannot, with a strong foundation in applying analytics alongside Infor M3. We can assist in complementing your existing inhouse resource, manage adhoc report requests or in the areas of analytics business requirements definition, business scoping, consolidating data sources, data integration, data management, BI application design, implementation and training services.

Inside Info launched Qlik to Australia in 2003 and are the top level Elite Qlik Partner. Our BI practitioners each have 10+ years' experience to guide you along the way. So, if you're looking to become more data-driven and take your use of data to the next level, we'd love to hear from you.
